Keep your farm safe
Don't let them in

SECURE FARM MACHINERY

Data Tagging Systems are designed for plant machinery. Many options are available and include:

- **Plant Identification Plate**: Tamper-proof plates that carry a unique identification number. Property can be tracked and returned in the event of theft.

- **Glass Tag Transponder**: Transponder is the size of a grain of rice and contains a unique code number which is permanently programmed into its integrated circuit. The number cannot be altered or deleted.

- **Self-Adhesive Tag**: A flexible self-adhesive transponder that contains a unique code number which is permanently programmed into its integrated circuit. The number cannot be altered or deleted and is impervious to attack by electric shock and magnetic waves.

- **DataDots**: Can be applied to any surface, making it virtually impossible for criminals to locate and remove them all.

- **Synthetic DNA**: Each piece of plant or machinery can be protected with an invisible unique **DNA** code.

If you see a crime in progress or there is a threat to life, always dial 999.
